

Abstract

Aqueous, colloidal gas black suspension

- 5 Aqueous, colloidal gas black suspension, containing
a gas black, an azo compound of general formula 1,

10

(1)

and water.

15 The aqueous, colloidal gas black suspension is produced in
that the gas black and the azo compound of general formula
1 are dispersed in water.

It may be used to produce inks, ink jet inks, paints,
printing inks, latices, textiles, leather, adhesives,
silicones, plastics materials, concrete and construction
20 materials.
